

Draft Gear Lift

The Challenge

Railroad Company TTX needed a small portable lift with the ability to move around their shop so they can safely remove the heavy draft gear from the rail road cars as needed during maintenance.

The Autoquip Solution

Autoquip provided an economical solution in the selection of the Titan family lift that utilizes the design strengths of this family for capacity and stability and portability. Specifications include: Titan Portable Draft-Gear Lift, 24" x 48" platform, 30" travel, self-contained air motor power, manual lever type air valve, large 6" diameter wheel and dolly set, paint - coated in standard RAL-9005 jet black. Sold directly to TTX for their maintenance facility in Jacksonville, FL. TTX Company is North America's leading provider of railcars and related freight car management services to the North American rail industry.

The Solution Benefits

Autoquip lifts was the best solution for this customer due to the foot print of the lift in the area it would occupy along with the competitive pricing of the lift and the lead time. This lift model and design has been proven over the years as an integral part of the rail industry for this type of application. These lifts have been used for over

40 years.
