

## **EW-DL Platform Lift to Display Automobile at Giveway**

### **The Challenge**

The Golden Nugget Casino in Lake Charles, LA needed a solution for transferring cars from their storage area to the casino floor for their monthly promotional giveaways.

### **The Autoquip Solution**

From Autoquip's Series 35 Scissor Lift Product Line, we manufactured an extra wide, double long scissor lift that is rated for a capacity of 7,000 lbs. and a platform measuring 111"x237". This size and capacity of the lift provides the customer flexibility to put various cars makes and models on the lift. Guardrails protect the car and passerby's during the load and unloading process.

### **The Solution Benefits**

The lift has allowed the customer accessibility and convenience to change out the cars after one promotion ends and another one begins.
