

## PLTC Dock Lift Moves Goods for Harrah's Casino

### The Challenge

The Harrah's AK-Chin in Arizona needed help in keeping up with their busy deliveries for the casino, restaurant, hotel, and shops. They needed a dock solution that would provide for flexibility and versatility to handle the various weight and sizes of goods being delivered to the casino. The lift also needed to be able to keep up with the extreme demands of a highly active delivery area with high load and off-load frequency.

### The Autoquip Solution

Our PLTC Dock Lift is designed to give the most flexibility and rugged performance for high volume loading and off-loading applications.

- Rated for a capacity of 6,000 pounds providing the lifting power to handle large loads.
- Nonskid platform size 72"x96".
- Travel limit switch installed to stop the lift when reaching a certain height to meet up with the dock.
- An oversized throw-over bridge covers any transition gaps between trucks to dock.

### The Solution Benefits

The PLTC allows the customer a safe, efficient, and economical means to load and off load goods from the truck

to dock improving productivity for this high volume casino.
