

## High Capacity Scissor Lift Used to Move Theatrical Equipment

### The Challenge

The theatre company of the Oregon Shakespeare Festival wanted an easier means to move theatrical sets and props from the delivery trucks to stage level.

### The Autoquip Solution

Autoquip designed a Super Titan Double Wide with 15,000 high capacity. The lift was designed to be split for shipment and then spliced together for installation.

Super Titan Double Wide 96LL19DW with 12'x18' platform and 15,000 lbs capacity with 8' of travel.

### The Solution Benefits

The double wide scissors lift provides the customer with the high capacity and platform size to move the fragile sets during the key performance season.
