

## Stage Lift for Florida Night Club

## The Challenge

The architectural plans for a new nightclub being built in Florida included a stage lift that would raise dancers up to the center of the dance floor. Autoquip was brought on board to design the stage lift with the following requirements:

1. Design a lift with a round platform to fit in preexisting pit.
2. Cut out hole in center of platform for a dance pole.
3. Travel from pit 36" to staging area.
4. Ship disassembled in order to fit within door openings at the club.

## The Autoquip Solution

- Product Family: Series 35 Double Wide
- Model #: 60S25DW
- Capacity: 4580 lbs.
- Platform: 132" diameter with rigid steel skirting
- Travel: 36"
- Speed: 25 seconds up/ 25 seconds down (loaded)
- Actuation: Hydraulic
- Paint: AQ Black

AQ Project Ref. 9S35DW-26654-1 120783

## The Solution Benefits

This innovative lift solution centered around on site assembly met all the customer's requirements and will provide a safe and reliable stage lift system for this new Florida entertainment venue.
